Elematic and Heidelberg Materials Precast Abetong to start cooperation in railway sleepers

Elematic Oyj and Heidelberg Materials Precast Abetong Ab have signed a commercial and technological agreement on production technology development for precast concrete sleepers.

With the agreement, the two companies aim to strengthen the global use of concrete sleepers and the technological development of their production technology.

Heidelberg Materials Precast Abetong AB has years of experience designing and producing railway sleepers and manufacturing the production technology. Elematic is a global leader in precast concrete production lines and machinery, with vast R&D experience in concrete machinery.

“We are proud to announce this partnership with Heidelberg Materials Precast Abetong AB, building on their many years of innovating sleeper line solutions. We see an opportunity to contribute to the sales of concrete sleeper production technologies positively, and to be the technology supply partner for Precast Abetong. Elematic’s ability to support the go-to-market efforts showcases our global reach towards our diverse customer base. In addition, being able to supply these production machines illustrates the depth and capability that our R&D and manufacturing teams possess. Looking forward to deepening our multi-year collaboration and bringing the best value to our customers”, says Elematic CEO, **Teppo Voutilainen**.

“With this cooperation, we will integrate Elematic experience and knowledge into the continued development and sales of our eminent sleeper production technology, says Heidelberg Materials Precast Abetong MD **Filip Sten**.

Elematic has delivered the first unit, a pulling and cutting device, to Heidelberg Materials Precast Abetong factory in Southern Sweden.
